

Under Coating Contract

Between

Solanum, LLC
152 Frenchtown Rd.
Milford, NJ 08848

And

Date _____

1. Scope

Solanum, LLC will apply anti-corrosion coating to the vehicles listed below, in the manner described in the flyer currently available at solanum-service.com. 85-95% of the surface under the vehicle will be coated in plant-based oil for the purpose of preventing corrosion. Unless otherwise noted below, this will be done sometime during business hours within a week of the date above, at a time mutually convenient to both parties.

2. Warranties

Solanum, LLC will take reasonable care to avoid creating any operational difficulties in the process of applying the treatment. It is understood that the treatment will result in some overspray and that treated vehicles will drip small amounts of oil for some time after treatment. Solanum, LLC will not be responsible for returning to remove this oil, except in the event its contacting exhaust components results in smoke. While reasonable care will be taken to prevent excess oil from accumulating on catalysts and other hot components, some minor smoking is possible, and the customer agrees to actively check for smoking during the first drive after treatment. The customer further warrants the vehicle is free of emissions faults and that the vehicle complies with the equipment and condition standards mandated by FMCSA. Solanum, LLC warrants the treatment will result in a reduction in corrosion during the 12 months after application, and explicitly notes here the treatment is not meant to result in 100% coverage or to be perfect at preventing all corrosion.

3. Terms

Payment for 50% of the amount due pursuant to the current pricing has been received as of the date noted above. This document serves as a receipt for this payment. The
